

# RIDE ^ RYTE™ BOOSTER SEAT

RIDE RYTE™ boosters are the **only** boosters tested to **meet and exceed FMVSS213** crash standards to **make lap-only belts safe** with E-Z-ON harnesses.

Designed and tested for lap and shoulder belts too!

30-100 lbs. for children in school buses and 40-100 lbs. family vehicles

## 2 seats in 1

Full-back converts to a No-back booster

No-back booster #NB321 (can be ordered separately)

30-100 lbs.  
33-54" in height  
for children in school buses and family vehicles

Full-back booster #FB322

Full-back converts easily to a No-back booster! Made of high performance polystyrene that weighs **less than 4 lbs.** No-back booster weighs **under 2 lbs.**

Same injury protecting material found in football and bike helmets to absorb crash forces.

**Full-back Booster Dimensions:**  
28" tall  
9" arm height 5" seat height  
base: 16" wide 15" deep

**No-back Booster Dimensions:**  
9" arm height 5" seat height  
base: 16" wide 15" deep

The energy absorbency of expanded polystyrene (EPS) is the high performance material RIDE RYTE™ boosters are made of. EPS is lightweight (98% air) and compression resistant. It's protective qualities exceed the typical booster seat on the market today. RIDE RYTE™ strength and shock-absorbency has repeatedly *surpassed* dynamic government crash test standards.

**Kids love the comfort!**  
**Parents love the security and convenience!**

and

Kid Y Harness

If you make the **LORD** your refuge, if you make the Most High your shelter, no evil will conquer you; no plague will come near your dwelling. For He orders **His angels** to protect you wherever you go. **Psalm 91: 9-11**

Millions of family vehicles and school buses are equipped with unsafe lap-only seat belts. Retrofit shoulder belts are often unavailable or extremely expensive.

Now passengers can enjoy the same level of protection as pilots and race car drivers with this booster seat system!

**RIDE RYTE™** boosters meet all federal and state regulations. A regular lap and shoulder belt can also be used with this booster!

Made of light-weight energy absorbing polystyrene that absorbs crash forces.  
**Meets FMVSS213.**

The **only harness and booster combination** dynamically tested to meet severe crash forces in vehicles.

## Kid Y™ harness

**EASY to USE!**

**1.5 inch webbing** is perfect for smaller passengers 30-100 lbs.

**Light-weight spring adjusters** on the harness and tether strap are easy to use and lock for safety!

**2 piece-chest clip** helps keep the harness straps in the correct position

**Complete instructions are included**

**loops for vehicle belt**

- kit includes:**
- 7/16" bolt
  - 2-3/8" washer
  - lock washer
  - tether bracket (swivel)
  - nut

**Check with your vehicle owner's guide for tether anchor weight limits for your vehicle.**

or...

**Install the tether kit that comes with the Y harness.**

**Use the Ride RYTE™ booster with a lap and shoulder belt and more...**

**E-Z-ON Harnesses can use lap and shoulder belts with a locking clip and a Ride RYTE™ Booster.**

**E-Z-ON Vest and CamHarnesses** can be used with a **Ride RYTE™ Booster** safely without the use of crotch straps.

**Sleepy Time Head Rest** Dynamically crash-tested for safe use in a vehicle.

- Provides a more **comfortable** ride in a car seat for kids and kids with **special needs**.
- Great support for kids with **respiratory** and **muscle toned disabilities**.
- **Perfect for just a sleepy rider.**

**NOTE:**

You can purchase the RIDE RYTE™ booster as a Full-back or as a No-back booster separately, however the Kid-Y™ harness cannot be sold separately.

You **must select** one of the models of **RIDE RYTE™** booster when you order your Kid-Y™ harness.
